EDUCATION

Bachelor of Science in
Computer Science from **St.
Mary's University**, 2023

SKILLS

Programming Languages

- Kotlin
- Java
- C++
- Dart

Frameworks I use

- Jetpack compose
- Flutter

Creative tools

- All Adobe CC suite
- Figma
- Krita

Word Processing/publishing
tools

- Microsoft office suite
- LibreOffice
- Scribus

SUMMARY

Creative and versatile professional with a BSc in Computer Science, combining technical development skills with strong design sensibilities. With a hybrid background in mobile app development, graphic design, motion graphics, and UI/UX design, I bring a multidisciplinary approach to building visually compelling and functionally intuitive digital experiences. I'm passionate about crafting interfaces and animations that are not only beautiful but also purpose-driven and user-centric.

WORK HISTORY

Mobile App Developer (Flutter)

Feb 2025 - Apr 2025

KnovusLab, Ethiopia

Worked with KnovusLab as a freelance Flutter developer on RAS, a feature-rich, LLM-powered chat application. I was responsible for building the front-end of the app from scratch, integrating advanced AI chat functionality, context-aware conversations, and responsive UI components. The app includes chat history, multi-threaded conversations, custom theming, and offline storage using SQLite. I used Provider for state management to ensure clean architecture and maintainable code. RAS was designed to be a smart, adaptable learning companion tailored to individual user needs, combining AI interaction with intuitive mobile UX

Desktop App Developer (Flutter)

Nov 2024 - Feb 2025

Zami, Ethiopia

Developed a cross-platform **Flutter desktop application** for Zami, designed as a marketing monitoring tool powered by AI. The application helps businesses track marketing performance using real-time analytics, automated insights, and visual dashboards. I handled front-end architecture, custom widget development, and integrated AI features that analyze campaign data to provide actionable feedback. The tool was optimized for desktop usability, ensuring smooth performance and scalable UI across various screen sizes.

Motion, Graphics design And Video Editor

Dec 2024 - Now

Online Communication, Ethiopia

At Online Communication, I've created lyric videos, album art, and motion graphics for major Ethiopian artists, contributing to high-visibility releases and campaigns. I've also designed social media graphics and brand visuals for well-known companies including Indomie and Double A. Working remotely, I deliver polished, on-brand content that meets tight deadlines and aligns with each client's voice and identity.

Motion and Graphics design

Sep 2023 - June 2025

HUBHUB, Ethiopia

I have worked as a graphics, motion, UI/UX designer, and video editor at HUBHUB. I helped the creative agency in expanding their portfolio into diverse fields due to my dynamic skills and they were able to handle more clients as a result.

Mobile Game Developer (Kotlin, Jetpack Compose)

May 2023

Personal Project, Ethiopia

Built a Rock-Paper-Scissors mobile game using Jetpack Compose to explore the new declarative UI paradigm in native Android development, moving away from traditional XML-based layouts. The project focused on understanding unidirectional data flow, and I implemented a structured state class to manage game logic and UI updates cleanly. This hands-on exercise helped deepen my understanding of modern Android app architecture and state management principles in Compose.

Mobile App Developer (Flutter)

Jan 2023 - Mar 2023

KnovusLab, Ethiopia

At KnovusLab, I worked as a Flutter developer on Nailestream, a music streaming application focused on Ethiopian music and culture. I was responsible for building core app features including music playback, user authentication, and UI implementation based on Figma designs. The app aimed to provide a smooth and modern listening experience while showcasing local artists. My work included integrating REST APIs, handling state management, and optimizing the user interface for performance across Android devices.

Web Developer

Jul 2022 - Sep 2022

Ethiopost, Ethiopia

I interned at Ethiopost as a web developer for 3 months while I was there I built an inside server issues ticket management system which has helped them track server issues from all their branches and minimize downtime significantly
